

MKSI Peterborough Jamaat

The Husaini Islamic Centre holds the record of being the first purpose-built mosque in the UK for the Khoja Shia Ithna-Asheri Community - built in 1978 - mostly comprising of families from the Uganda Exodus in 1970s.

In 1989, the major extensions were completed to give the present shape and footprint of the facility that you see today. One shortcoming has been access to the First Floor for disabled, frail and elderly members of the community.

This Platform Lift Project aims to add capacity to the facility to accommodate the needs of disabled members, empowering them to fully engage at all capacities and to instil a sense of belonging, for both members and wider society.

It is hoped that this project will act as a catalyst for improved inter-generational cohesion and interaction on family and religious values for the betterment of this and future generations.

Project Status and Target

There is an existing Planning Permission for an 8 pax Hydraulic Passenger Lift. However, this has not been realised due to the high capital and operational expense involved.

This Platform Lift Project is a viable and cheaper alternative that will meet with the demands on the disabilities within our community and will enable full access to the First Floor Halls.

An alternative Planning Application has been lodged and we hope to obtain approval and clear Building Regulations before April 2009. The lead-in period and construction on site will take a further 3 months, with target completion date in mid-May 09

We are arranging to post all progress details and reports on our website at:
www.mksipeterborough.org

Project Budget

Section	Budget
EquiLift Platform Lift	£ 15,067
Optional Platform Lift Extras	£ 2,850
Builders Costs (Estimate)	£ 6,000

How will it look and work

We have designed the lift enclosure to blend in with the existing facility and elevations, in order that it will not look 'different' or done in a different material.

The brickwork will match the existing walls, and we will use the same doors and windows in order to maintain the same elevation and reduce costs. All internal walls and ceilings will have smooth plaster finish, and painted in neutral colours to match existing.

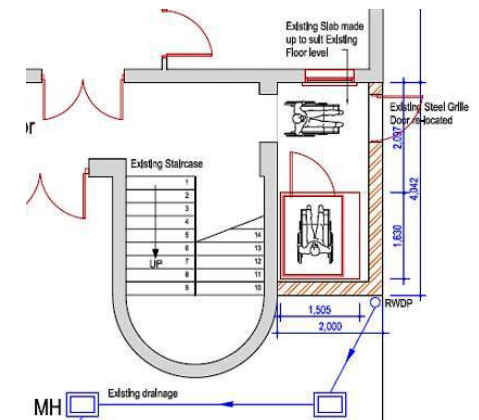

The Platform Lift is a semi-automated elevator and is glazed with an opening door. The Lift travels at about 20 seconds between the Ground and First Floor and can take upto 400 kg payload = one wheelchair and two other pax, or four average people.

786 : 092 : 110

'Those who (in Charity) spend their goods, by night and by day, in secret and in public, have their reward with their Lord; on them shall be no fear; nor shall they grieve'

Al Baqarah 02:274
